

Foreign language teaching

In Erfurt

The latest results of the English competence tests are a real cause for celebration! Students in class 6a solved an impressive 85% of the tasks correctly on average, while students in class 6b even achieved a sensational 92%. These outstanding achievements reflect the students' great passion for foreign language teaching - as well as the extraordinary commitment of their teachers.

What makes these successes particularly remarkable is the fact that most of the children are not native speakers. Their achievements demonstrate not only their motivation and willingness to learn, but also the effective teaching and outstanding support they receive from the teaching staff.

The English lessons at our school are instrumental in helping pupils to continually improve their language skills and become increasingly confident in their use of English. These positive results encourage not only the students themselves but also the whole school community to continue to strengthen the individual language skills of each student.

The recent successes in the competency tests are a clear sign that our school is on the right track. They inspire us all to continue to give our best and actively promote the linguistic development of our students. Let's work together to ensure that future years also achieve such great successes!
